

Thank you for considering becoming a drop-off location for our charity.

We have a small desk sign (just bigger than a piece of paper) that would need to be displayed if possible.

You would accept recyclable electronics from our donors free of charge.

When someone donates recyclables we would ask that you give them one of our pamphlets and a thank you note that we provide ahead of time to you. Many of our drop-off locations have this material out on a desk and let the donor grab it if they would like.

Whenever the amount of materials reaches a level that needs picked up, just give us a call and we will pick up from you, usually within 24hours.

We have an entire welcome package that explains everything in detail if you become a drop-off location.

We would list your organization on our website along with your address and a link to your web site with your hours of operation.

In order to get started I would just need your approval and I would bring the materials to your location and go over everything with you or whomever will be on location to receive materials at the time.

Please feel free to call me with any questions.

Thank you,

Dan Hurst
